

Dear participant.

Thank you for joining the Multidisciplinary Network for Focal therapy of Prostate Cancer the 3rd of December 2020. Needless to say, we had preferred to gather you all in person. Despite the virtual format we look forward to seeing you all online for takeoff. To be part of the network you need to have expertise within prostate cancer and be willing to contribute actively.

Please register by sending an e- mail to simbuu@rm.dk no later the 2nd of December 2020.

This first meeting (see agenda below)

The aim of this founding meeting is take the first steps towards a thriving network. It is organized to get acquainted with each other through short presentations of your work. This will hopefully open for discussions about what interests and opportunities the network holds. The meeting should shed light to the shared interests within the network and lead to the formation of two or more working groups. These working groups are meant to elaborate with their ideas for designing studies to be presented at the next meeting in May.

Format

Our international members will each make a 12-15 min presentation on xxx. Our national teams/member will make 5 min presentations on the most relevant topics. You will share your screen for the presentation if you have slides. Please, do not hesitate to contact me in case you have questions reading the content or format.

Next meeting

The next meeting will take place 25-26th May 2021 at Sandbjerg Gods in Denmark as a symposium. We hope the corona situation will give us the chance to meet in person so we can elaborate in depth with the defined research questions and protocol propositions. Please, save the dates.

Kind regards

On behalf of the network

Simon Buus

Agenda the 3rd of December 2020

15.00 Welcome Simon Buus, Dept of Oncology, Aarhus University Hospital
