

Danish Comprehensive Cancer Center

Herlev Pathology Symposium:

Soft tissue tumors of the skin

Dr. Jason L. Hornick, M.D., Ph.D.

Professor of Pathology

Harvard Medical School

Director of Surgical Pathology and Immunohistochemistry

Brigham and Women's Hospital

Boston, MA USA

6th September, 2018

Herlev and Gentofte University Hospital, Denmark

Time: 6th September, 2018, 9.30 – 16.30

Venue: Store auditorium, Herlev Hospital,
Herlev Ringvej 75, 2730 Herlev, Denmark

AGENDA

- 9.30 – 9.35: Welcome
- 9.35 – 10.35: **Cutaneous fibrohistiocytic tumors**
- 10.35 – 10.55: Coffee
- 10.55 – 11.55: **Cutaneous vascular tumors**
- 11.55 – 13.00: Lunch
- 13.00 – 14.00: **Cutaneous nerve sheath tumors**
- 14.00 – 14.20: Coffee
- 14.20 – 15.20: **Cutaneous epithelioid tumors**
- 15.20 – 15.40: Coffee
- 15.40 – 16.25: **Superficial soft tissue tumors: What's New?**
- 16.25 – 16.30: Round up

Registration: Email to: conny.jensen@regionh.dk before 27th August 2018. Please state your name, department and hospital at registration. The latest information will be shown at www.dansktopatologi.org

Dr. Jason L. Hornick is the Director of Surgical Pathology and Immunohistochemistry at Brigham and Women's Hospital. He is a Professor of Pathology at Harvard Medical School and a Consultant at the Dana-Farber Cancer Institute.

Dr. Hornick was a member of the 2012 consensus and editorial working group for the WHO Classification of Tumors of Soft Tissue and Bone, the Soft Tissue Sarcoma Expert Panel for the AJCC 8th edition, and the Sarcoma Analysis Working Group for The Cancer Genome Atlas (TCGA).

Dr. Hornick has published over 350 original papers, review articles, and book chapters and has edited the textbook *Practical Soft Tissue Pathology: A Diagnostic Approach*, the 2nd edition of which was recently published. He is an Associate Editor for *Sternberg's Diagnostic Surgical Pathology* and serves on many editorial boards, including the *American Journal of Surgical Pathology* and *Modern Pathology*.

Course objective: To provide a comprehensive in-depth update on selected common soft tissue tumors of the skin pertinent to everyday practice of skin pathology and to improve attendees' diagnostic skills. The emphasis will be on morphology, diagnostic tools including immunohistochemistry, molecular changes, clinical aspects and critical differential diagnoses and pitfalls likely to be encountered by the general pathologists. The topics are directed mainly at surgical pathologists, but also at clinicians with interest in soft tissue tumors.

Tuition: Participation in the symposium, coffee/tea and lunch is free, made possible by the generous sponsorship of the Danish Comprehensive Cancer Center (www.dcccancer.dk)
